

Is your home
using more energy
than it should?

It's likely you don't have LLumar Window Film on your glass windows and doors. And it's equally likely that you're enduring lots of other inconveniences—from hot and cold spots to fading furnishings and annoying sun glare—that this film can easily cast away. Ask your dealer about taking the LLumar "Bright Test" and find out how LLumar can increase your comfort from heat and glare.

See

The Light!

Simply select your favorite shade of LLumar film. Your authorized LLumar dealer can have your film professionally installed with little disruption to your home's daily activities. And every dealer-installed LLumar product comes with a manufacturer's warranty for film and labor.

A More

Efficient Way

LLumar, a virtually invisible window film, rejects up to 79 percent of solar energy—and lets you smartly keep the heat inside in the winter and outside in the summer, helping to reduce your energy use. Plus, with LLumar, your home will stay more comfortable all year long, with heating and air conditioning more evenly distributed through every room. You can also say goodbye to squinting and eye discomfort, since LLumar reduces sun glare that can hinder computer work and TV watching alike.

Furnishings

That Last

What's more, LLumar helps keep your home furnishings looking good longer, by blocking a full 99 percent of the damaging UV rays that can fade and deteriorate everything from draperies and wood furniture to carpeting and upholstery.

Durability

You Can Depend On

LLumar's patented SR coating makes it the industry's strongest and most durable window film. It's also specially formulated to resist scratches, yet is easy to maintain since it can be cleaned with everyday household window cleaning products.

And for strength that really pays off when you need it most, there's LLumar Magnum Window Film: This microthin film is comprised of polyester and metallized coating bonded by adhesives which form a defensive "sheath" to help contain shattering glass and minimize damage caused by rough weather or vandals. By helping to hold broken glass together, it even helps deter thieves.
